

Group 14 - CityZen [Final Proposal]

Project Title:

"CityZen" - Job Search + Rental Property App

Project Description:

Create an application that takes in a user's desired job/career type and desired city location in the U.S and matches them to available jobs in that city with rental properties in their pay grade.

User Story:

As a job seeking professional looking to move,
I want to be able to find available rental housing within a desired city,
so that I can improve my career and quality of life.

Wireframes:

See PDF Attached.

APIs to Be Used:

- Rapid API - <https://rapidapi.com/apidojo/api/realtor>
- Adzuna API - queryURL:
https://api.adzuna.com/v1/api/jobs/us/search/10?app_id=d279677d&app_key=34c685494080bb76386590eb0d7c02f9&what=developer&where=Atlanta

Just set up variables for what position and where(city).

Rough Breakdown of Tasks:

Sami: Logo, Design, Graphics, CSS

Raj: Real Estate API, script, and wireframing

Ryan: Project mgmt., HTML, Copy, & JS support

Tyler: Zip Recruiter/jobs API, scripting
